

Schedule NEM
NET ENERGY METERING

Sheet 1

APPLICABILITY

Applicable to Eligible Customer-Generators and Eligible Customer-Generators Utilizing Wind Energy Co-Metering, as defined herein below pursuant to Public Utilities (PU) Code Sections 2827 and 2827.8, with a generating capacity up to 1,000 kW. Customers eligible for service under this Schedule are not required to take service under Schedule S. This Schedule is closed to new customers once the total combined rated generating capacity, of all Eligible Customer-Generators and all Eligible Customer-Generators Utilizing Wind Energy Co-Metering, exceeds two and one-half percent of Southern California Edison's (SCE) aggregate peak demand. (T)

If an eligible Customer-Generator, or Eligible Customer-Generator Utilizing Wind Energy Co-Metering, participates in Direct Access (DA) with an Energy Service Provider (ESP) or Community Choice Aggregation with a Community Choice Provider (CCP) that does not provide distribution services for the direct transactions, the ESP or CCP, as applicable, and not SCE, is obligated to provide NEM to such customer. Additionally, the customer is responsible for the incremental costs associated with the metering and billing services provided by SCE to a CCP's NEM customer, pursuant to Special Condition 2.d of this Schedule.

TERRITORY

Within the entire territory served.

RATES

As determined in each billing period, when an Eligible Customer-Generator, or an Eligible Customer-Generator Utilizing Wind Energy Co-Metering, is a net consumer of energy, E_s is greater than E_F , where E_s is energy supplied by SCE and E_F is energy generated by the customer's electrical generating facility and fed back into SCE's electrical system, the resulting net consumed energy will be used in the calculation of all applicable energy charges, calculated by multiplying the customer's net consumed kWh by the applicable energy rate components of the customer's Otherwise Applicable Tariff (OAT), in each Time-Of-Use (TOU) period, when applicable.

As determined in each billing period, when an Eligible Customer-Generator, as defined in Special Condition 5.a, is a net producer of energy, E_F is greater than E_s , the resulting net produced energy will be used in the calculation of energy credits, calculated by multiplying the customer's net produced kWh by the applicable energy rate components of the customer's OAT, in each TOU period, when applicable.

As determined in each billing period, when an Eligible Customer-Generator Utilizing Wind Energy Co-Metering, as defined in Special Condition 5.b, is a net producer of energy, E_F is greater than E_s , the resulting net produced energy will be used in the calculation of generation energy credits, calculated by multiplying the customer's net produced kWh by the applicable Utility Retained Generation (URG) rate component of the customer's OAT, in each TOU period.

For all customers served under this Schedule, Special Condition 3.g shall apply to any remaining credits at the end of each Relevant Period.

SPECIAL CONDITIONS

1. Required Application and Contract: An executed Application For A Net Energy Metering And Generating Facility Interconnection Agreement (Form 14-753), and an executed Net Metering And Interconnection Agreement (Form 16-344), are required prior to receiving service under this Schedule.
2. Metering:
 - a. For customers whose OAT does not require a TOU meter, or is not an Eligible Customer-Generator Utilizing Wind Energy Co-Metering, net energy shall be measured (metered) using a single meter capable of registering the flow of electricity in two directions. If the customer's existing meter is not capable of measuring the flow of electricity in two directions, an appropriate meter shall be provided at the expense of the customer. SCE may elect to install an additional meter or meters, at SCE's expense, with the customer's consent. Such additional metering shall be used only to provide the information necessary to accurately bill or credit the customer.
 - b. For customers whose OAT requires a TOU meter, and all eligible Customer-Generators Utilizing Wind Energy Co-Metering, net energy shall be measured (metered) using a single TOU meter capable of registering the flow of electricity in two directions. If the customer's existing meter is not a TOU meter capable of measuring the flow of electricity in two directions, an appropriate TOU meter shall be provided at the expense of the customer. SCE may elect to install an additional meter or meters, at SCE's expense, with the customer's consent. Such additional metering shall be used only to provide the information necessary to accurately bill or credit the customer.
 - c. For all customers served under this Schedule, when SCE determines that dual metering is required for the purposes set forth herein, and such customer refuses consent for installation of dual metering, SCE shall have the right to refuse interconnection.
 - d. Where SCE provides metering and billing for an ESP's or CCA's NEM customer, the ESP or CCA, as applicable, shall be responsible for the applicable charges for such services, as set forth in Schedule ESP-DSF for the ESP and as set forth in Schedule CCA-SF for the CCA. (T)
(T)
(T)
3. Billing:
 - a. SCE shall provide all customers served under this Schedule with net energy consumption information and/or net energy production information with each monthly bill.
 - b. For all customers served under this Schedule all applicable Monthly Customer Charges, Minimum Charges, Demand Charges, and/or other non-energy related charges, excluding any adjustments due to power factor provisions, as defined in the customer's OAT, shall apply, when applicable, regardless of the Customer's monthly net generation.

SPECIAL CONDITIONS (Continued)

3. Billing: (Continued)

- c. For Residential and Small Commercial Customers (as defined in SCE's Rule 1), energy related charges and credits are accumulated until the end of a Relevant Period. However, upon a customer's request, SCE shall permit a Residential or Small Commercial customer to pay all applicable energy charges monthly. Such request must be made by the customer upon initiation of service under this Schedule or upon written notice to SCE no later than thirty (30) days prior to the end of a Relevant Period, whichever applies and customers cannot change their billing preference at any other time. For all Eligible Customer-Generators Utilizing Wind Energy Co-Metering, and all eligible customers other than residential and Small Commercial Customers, it is mandatory to pay all applicable charges, both energy and non-energy related, on a monthly basis, in accordance with the customer's OAT. (T)
- d. For Residential and Small Commercial Customers, the monthly bills shall show the accrued energy charges owed to SCE, or accrued energy credits for net energy produced, whichever applies, until the end of a Relevant Period. (T)
- e. For all customers served under this Schedule, except Eligible Customer-Generators Utilizing Wind Energy Co-Metering, energy credits will be used to offset other time periods and/or subsequent billing periods' energy related charges when they exist. However, at no time will energy credits be applied towards any non-energy related charges and such credits cannot be carried over to a new Relevant Period.
- f. For all Eligible Customer-Generators Utilizing Wind Energy Co-Metering, generation energy credits will be used to offset other time periods and/or subsequent billing periods' generation-related energy charges when they exist. The generation energy credits of an Eligible Customer-Generator Utilizing Wind Energy Co-Metering can only be used to offset the generation portion of its energy related charges, and such credits cannot be carried over to a new Relevant Period.
- g. At the end of each Relevant Period (as defined in Special Condition 5.f of this Schedule) following the Date of Parallel Operation of the customer's generator with SCE's electric system, SCE shall proceed as follows:
 - 1) For all Residential and Small Commercial Customers who did not choose to be billed monthly for their energy related charges, SCE will subtract all accrued energy credits from all accrued energy charges. If this calculation results in monies owed to SCE, such energy charges shall be due and payable in accordance with the customer's OAT. However, if this calculation results in an energy credit, SCE shall neither pay the customer for any unused energy credit nor carry forward any unused energy credit. The unused energy credit shall be zeroed out and a new Relevant Period shall commence. (T)
 - 2) For all Eligible Customer-Generators Utilizing Wind Energy Co-Metering, all customers who do not meet the definition of a Residential or Small Commercial customer, and all Residential and Small Commercial Customers who chose to be billed monthly for their energy related charges, any unused energy credits shall not be carried forward to the start of a new Relevant Period, rather the unused energy credits shall be zeroed out and a new Relevant Period shall commence. (T)
- h. If a customer terminates service under this Schedule prior to the end of a Relevant Period, SCE shall reconcile the customer's consumption and production of electricity and bill the customer for positive Net Energy charges, if any.

Schedule NEM
NET ENERGY METERING

Sheet 4

(Continued)

SPECIAL CONDITIONS (Continued)

4. Grandfathered Generating Facilities: Eligible Customer-Generators, and Eligible Customer-Generators Utilizing Wind Energy Co-Metering, served under this Schedule who have all local and state permits required to commence construction of their eligible generating facility on or before December 31, 2002, and have completed construction on or before September 30, 2003, shall be entitled to the net energy metering terms in effect on the date the local and state permits were acquired, for the life of the generating facility, regardless of any change in customer or ownership of the generating facility.

5. Definitions: The following definitions are applicable to service provided under this Schedule.
 - a. Eligible Customer-Generator: A Residential, Small Commercial (as defined in SCE's Rule 1), commercial, industrial, or agricultural customer who uses a solar or wind turbine electrical generating facility, or a hybrid system of both, with a total capacity of not more than 1,000 kW, and where the wind turbine electrical generating nameplate capacity is not greater than 50 kW, that is located on the eligible customer's premises, that is interconnected and operates in parallel with SCE's electric system, intended primarily to offset part or all of the customer's own electrical requirements, and that meets all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Public Utilities Commission regarding safety and reliability. An Eligible Customer-Generator whose electrical generating facility meets these standards and rules shall not be required to install additional controls, perform or pay for additional tests, or purchase additional liability insurance. (T)

 - b. Eligible Customer-Generator Utilizing Wind Energy Co-Metering: A customer who uses a wind energy electrical generating facility with a generating nameplate capacity greater than 50 kW, but not exceeding 1,000 kW, including solar and wind hybrid systems where the wind turbine electrical generating nameplate capacity is greater than 50 kW, that is located on the eligible customer's premises, that is interconnected and operates in parallel with SCE's electric system, and that is intended primarily to offset part or all of the customer's own electrical requirements, and that meets all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and electronics Engineers, and accredited testing laboratories such as Underwriters Laboratories and, where applicable, rules of the Public Utilities Commission regarding safety and reliability. An Eligible Customer-Generator Utilizing Wind Energy Co-Metering whose electrical generating facility meets those standards and rules shall not be required to install additional controls, perform or pay for additional tests, or purchase additional liability insurance.

 - c. Date of Parallel Operation. The date SCE provides the customer with SCE's written approval to commence parallel operation of the generating facility.

 - d. Net Energy: The difference between the electricity supplied and/or delivered through SCE, and the electricity generated by the customer and fed back into SCE's electric system, measured over the Relevant Period. Thus, where E_S is energy supplied and/or delivered by SCE, and E_F is energy generated by the customer and fed back into SCE's system:

$$\text{Net Energy} = E_S \text{ minus } E_F$$

 - e. Otherwise Applicable Tariff: The customer's regularly filed rate schedule under which service is rendered.
