

bringing solar power home

INDEPENDENT

Energy through the power of the sun. It's here now with a reliable, fully-integrated residential solar system from Sharp Solar. Finally, homeowners can take steps to reduce their dependency on power companies. For 40 years, Sharp has been the industry leader in photovoltaic power generation, and now we're putting the power of the sun in people's hands.

RESPONSIBLE

A Sharp Solar system is one of the most responsible choices concerned homeowners can make to protect the environment *and* help control their electricity budgets.

Sharp's high-quality, high-efficiency solar electric solutions use no fossil fuels to produce electricity, and generate no pollution. They're safe, clean and quiet, providing total home comfort.

ENLIGHTENED

Taking the lead. Defining the future. At Sharp, we're creating unique, high-tech, high-style products for greater comfort, convenience, and superior home entertainment. And now our industry-leading photovoltaic technology is bringing solar home. Solar energy from Sharp... it's positively brilliant.

A SMART ENERGY CHOICE.

Our exclusive system design allows placement of solar panels on multiple roof faces without sacrificing efficiency.

With Sharp's complete solar system, roof-installed solar panels convert sunlight into DC power, which the power conditioner then transforms into AC electricity for reliable residential use. Once they've harnessed the power of the sun, homeowners can enjoy these benefits:

- Become their own power producer
- Utilize free energy from the sun
- Help minimize the effect of rate hikes
- Increase the home's value
- Protect the environment
- Enjoy superior reliability, comfort and security

Safe, clean solar energy from Sharp favors the environment.

DESIGNED WITH TODAY'S HOME IN MIND.

Our solar power monitor is attractive and easy to read.

Sharp Solar systems are designed for easy installation and unmatched ease of use. Our attractive solar power monitor has finger-touch controls with clear, easy-to-read messages and graphic readouts. Sharp's fully-integrated systems assure component compatibility and efficiency.

- Over 55,000 Sharp Solar systems currently installed worldwide
- Components install easily—unsurpassed construction flexibility
- Highest-quality materials and workmanship
- User-friendly LCD display shows power levels, CO₂ reduction levels,* and cumulative data on positive environmental impact
- 25-year solar module warranty/5-year system warranty
- Network of Sharp Certified Installers

Sharp's complete system turns sunlight into electricity for reliable use in the home.

A BRILLIANT SOLUTION, ALL FROM ONE SOURCE.

Sharp innovations, like AQUOS™ Televisions, bring excitement into the home.

Sharp's revolutionary consumer products, like our AQUOS ultra-thin Liquid Crystal Televisions and advanced 1-Bit Audio technology, lead the industry. And we're also pioneers in photovoltaic power generation. Today, Sharp is the #1 manufacturer of solar panels in the world, with more residential solar systems in operation globally than any other manufacturer. Sharp's unparalleled standard of quality is why more consumers, home builders, and contractors trust Sharp for quality solar solutions, and why owners can expect consistent, reliable performance year after year.

* Consult owner's manual for assumptions used in CO₂ calculations. May not be available on all models.

TYPICAL RESIDENTIAL SYSTEM COMPONENTS:

- Sharp photovoltaic modules (solar electric panels) with black frames
- Matching black mounting hardware and fastening clamps
- Sharp power conditioner to transform DC into AC electricity
- Sharp LCD display screen to monitor system performance
- Wiring kit to connect all equipment
- AC and DC electrical disconnects

Sharp's exclusive system—with solar panel array (triangular and rectangular modules shown), DC to AC power conditioner, and user-friendly LCD solar power monitor—puts the power of the sun into a homeowner's hands.
